\$23,899,675 Excess of Imports 'ever exports, in nine months, \$41,361,963
The balar see argeinst us in a trade of nine months, mounts to the enormous sum of forty one millions three quadred are ad sixty-one thousand nine hundred and sixtyree dol' ars. The exports of specie for September have en very trifling to what was anticipated, the amount ing o' sly \$609,292. The total exportation of specie from this p out for the past three months, only am \$1,984 ,972, as follows :-

This is a very small amount, and the limited shipments can only be accounted for, from the fact, that almost every one largely indebted abroad, is putting off the time of payment as long as rossible. They cannot get out of debt by postponing the time of payment; the amor int to be paid is only accumulating and must become redifficult to lift eventually.
There is not the slightest foundation for the

There is not the slightest foundation for the reports that large quantities of foreign manufactures—of the recent importations—have been re-shipped, sent back from whence they came. The total value of foreign merchandise exported from this port from January 1st to October, according to the above table, is only \$3.350,533. This amount is composed of many items of merchandise of the growth and production of foreign countries, except foreign manufactures. In August and September only \$3.23,325 worth of foreign merchandise, of every description was exported. This is sufficient evidence that nearly the whole of the immerca importations of the next piece. whole of the immense importations of the past nine months is yet in the country. Owners of these goods abroad much rather submit to a sacrifice in this market than in their own, both on account of their pocket and Our auction houses are filled with these foreign annfactures, and prices for them are depreciating every day. Many jobbers have been serious sufferers by the late decline in prices. Large purchases were made early in the season, at the prices then current, in anticipation of avery extensive trade. They have been unfortunate in their anticipations. Trade has not been so active as In their sinticipations. Trade has not been so active as looked for, and prices have fallen, from the immense supply of goods and the diminished amount of business compared with the spring trade. The importers, jobbers and retailers have very large stocks at this moment, and great sacrifices must be submitted to by all parties. We have too many goods in this market to keep up a healthy state of things. Our manufacturers have been, all through the season, very actively engaged in turning out goods, and the market is as much overstocked with domestic as fereign manufactures, and the depreciation in prices is equally as great on one as the other. The first evil effect of the over-trading carried on for the past two seasons will show itself in the most remote section of the coun try, among those who were induced to purchase larger stocks of goods than they were able to pay for, and who must become bankrupts by an over-extension of credits From this the troubles spread through everydepartment of business, and bankruptcy follows on. The importer eannot pay the manufacturer, unless the jobber pays him; the jobber cannot pay the importer unless the retailer pays what he owes, and the whole train of trade is so mingled together that when one of the links give way, the whole system becomes deranged. At the rate the commercial classes of this city have progressed for the past nine months a revolution in commercial affairs, commencing as we have stated above, must assuredly come round in less than three years A look at the vest change that has taken place in our foreign trade since 1842, is sufficient to convince any one of the truth of the remark. The importations into the United States for 1843 amounted to \$89,255 182, and the exports to \$100, 063,266, leaving a balance in our favor of \$10 808,084 view of the imports and exports of this city for a few years past, will settle the subject in the minds of all con-

Clusively.

This is the best evidence in the world of the danger that sucrounds us, and a plain, comparative statemen like this must convince every one that we are going ahead too fast to insure safety. The statement that we have given ab we of the imports and exports of this port, is made up under the new divisions of the year. The excess of free goods in 1843, is to be attributed to the numerous cargoes of tes and coffee entered in the second quarter, in antici pation of a duty being put upon these articles during the sitting of Congress, then in session. Every official return from the Treasury Department or from the Custom House, shows a very great increase in the receipts of fo

reign merchandise into the country, and we have we grounded fears that a great deal of commercial trop and embarrassment will grow out of the

Coal Trade.

The shipments this week (says the Pottsville Journal of the 5th inst) show an increase of 1,568 tons, 1,333 of which are by the canal. This is caused by the refreshing rains in this quarter, which have replenished the quantity of water in the canal. Freights have again receded to 85 cents, by the canal. to Philadelphia; to New York, \$2 30.

The Commercial List states that the demand for coal continues active for shipment, and also for city consumption, and holders are very firm, with an upward tendency in prices. Sales of white ash lump at \$3 24 a 3 37½; and red ash at \$3 37½ a 3 50 per ton prepared white ash at \$3 50 a 3 42½; and red ash \$3 62½ a 3 75 per ton, cash—when on time, with interest added. The shipments from the Lebigh, for the week ending on the 21st, amounted to 256, 508 tons. The following are the rates of freight from Philadelphia:—

DR. CORBITT may be consulted confidentially at the Office, 16 Danas street, two doors from Chatham. Strangers are respectfully informed that Dr. Corbitt is assent to the confidency of the City of New York, and that he has exclusively confined his practice from being general to the teatment of certain classes of diseases, (now over eleven tears in the city of New York,) which ingaces his entire attention. The annals of medicine do not record greater success than is to be found in his practice. The Doctor cautions the unfortunate against the use of mercury, as it has its thousands of victims. Recept cases use in a few days removed entirely from the system. See that you are judiciously treated by a person legally qualified, are not by pretenders and quacks as there are several of them in this city. Persons afflicted with protracted and inveterate cases need not despair of being restored to health, by applying to Dr. Gorbitt, A practice of many years han established the Doctor's reputation for skill and .spectability. WHO DISCOVERED IT!

DR. A. C. CASTLE, Anno Domini 1828, first introduced to the notice of the public the mode of inserting Artificial Teeth on the principle of adhesion by atmospheric pressure. In 1825, 48, other detactats make the laughable claim of this method as their discovery. As well might they claim his inimitable Paste for filling hollow, tender teeth, which is put into the tooth in a soft state, and in a few seconds becomes as hard and in all respects as good as the original sound tooth. The first families in the United States use and recommend it. The most distinguished physicianas, made coquizant of its harmless combinations from their own practical esperience, recommend it. It has esceived the highest commendation from the "Press." Dr. Castle releas to the Spanish, French and English Ambassations of the Universities, N. Y., and New York City Hospital, and Singlish Consist, N. Y., the Physicians and Surgeons of the Universities, N. Franch Theatre.—On the French side of the Bee, of yesterday, we see with infinite pleasure, that letters have been received from Mr. Davis, the director of the Theatre d'Orleans, announcing that he has succeeded in making the greater part of his engagements for the approaching season. The following are the names of the artist that had be in definitely or greed up to the date of the shiling of the Britannia:—Bartone, M Garry, of the theatre of Lyons: Bass, M Houvry, do it e Hague, Light Tenot, M Couriet; Dagazen, Mad. Sephen; First "young men," M Montassier, of the theatre of Amsterdam. We have already announced Mile Caive's engagement as prima danna. We repeat our gratification at the success of Mr. Davis, from the refued and refining pleasure we have for years enjoyed at the French theatre. The editor of the Bee remarks, that in his opinion, from the definite closing of a French theatre. The editor of the Dee remarks that in his opinion, from the definite closing of a French theatre here date the commencement of the corruption and final extinction of the purity of the French language as spoken in this State. We entertain no doubt of the correctness of his opinion.—E. O. Pic., Sept. 20.

Cask of Ford.—The case of Ford is slowly progressing; Mr. Colt occupied the whole of yesterday morning in opening the case for the defence. Several witnesses gave in their testimony in the afternoon; nothing, materially new, however, was elicited, with the exception perhaps, of some facts having a tendency to show a rather irrastional state of mind, under which the prisoner labored after the disappearance of his daughter.—St. Louis Recille, Sept 27.

FROST —On Sunday night last, 29 hult. (says the Milledgeville Recorder of the 1st inst) we had a frost, the earliest we recollect for many years. From its being dry, it was not so severe, however, as to kill vegetation to any considerable extent. It will likely check the growth of cotton, and other tender plants, without doing any material damage to the farmer—there being no late growth to mature.
